MEDICAL

07.4 MEDICAL AND CONCUSSION PROTOCOL

WBD & the UCI are committed to improving rider safety & ensuring that athletes taking part in our events receive the highest standard of medical care possible. One area where we want to ensure consistency across all MTB disciplines at our events is the identification of potential rider head injury / concussion events & the subsequent assessment & medical diagnosis of concussions where necessary

It is the responsibility of all team staff and riders to familiarise themselves with the signs and symptoms of a potential concussion. If they or their athlete display any symptoms, they are to present themselves to the on - site WBD medical liaison officer for assessment.

Any racer who is asked by a race official to undergo a medical or concussion assessment by a Registered / Licensed Health Care Professional must comply.

Any racer who fails or refuses a concussion assessment by a Registered / Licensed Health Care Professional during an event will be removed from the current training session or race. They will be prohibited from further participation until cleared in writing by a Registered / Licensed Health Care Professional to resume such activity.

Should a concussion be confirmed by a Registered / Licensed Health Care Professional, the athlete is responsible for completing a "graduated return to activity" plan.

During all WBD events, medical staff may collect preliminary racer injury and illness data, to monitor the magnitude of issues that occur. As part of a racer's participation, this will include a racer's medical data should any racer sustain an injury (or illness) during an event.

No racer will be identifiable at any stage during any collection of this data, and any data collected on a racer will be always anonymized and kept strictly confidential.

The information gathered may be used by WBD to help guide and direct future racer health and injury/illness prevention initiatives. A racer does not need to do anything as part of this data collection
